

April 11, 1995

Dear Dr. Gebauer,

I was so glad to meet you and to hear you speak about your current work at the PIRP workshop at Harvard on April 3. And I enclose the article I had mentioned, which owes much to your research and advocacy. (See pp. 8-10).

Sincerely,

Sissela

November 12, 1985

Dear George,

It was a pleasure to see  
and to hear you at the  
Ammberg Conference, and I am  
glad to hear about the progress  
of the CEM plans. I have not  
yet received the materials  
you mention, and look forward  
to seeing them. But since you  
mentioned requesting that I  
serve as "convener," I want  
to write right away to say  
that I prefer not serving as  
a convener for a conference  
that I shall not be attending.

and that I have taken  
no part in planning.

I shall be eager to  
hear how it comes together  
and how the different work-  
shops turn out.

With warm greetings,

Sissela (Bok)

P. S. I shall be back in Cambridge  
next week, at my usual address.
