

08/02/93

Dear George,

I sincerely appreciate your patience and continued interest to my various "deeds and needs".

Enclosed to this short note please find my paper for G.F. Guggenheim Foundation's Grant along with 3 copies of your referee's report (I put more than one for your convenience). There are CV, list of publications, list of courses I may suggest for U.S. Universities / Schools as a lecturer. too.

I put a copy of the "RED" - it is our pilot issue with some errors which were occurred during printing process. Columns were splitted and then separated and some letters were lost but others appeared suddenly in unappropriated places. Anyway, you can see what was the idea of RED.

My husband Igor has his own E-mail number at Princeton University and we may communicate directly. I'll send you some words to be sure that it works.

On the back side of my card you'll find Igor's E-mail number.

I am still impressed by your reprints.
Your way of expressing ideas has a lasting
effect on me - like your "story-telling"
subject for discussion during Moscow conference
in 1991.

George, you are great! I love you,
and I am in raptures over your ability
to be beyond this multifaceted reactive
"scientific style".

Love,

Lyuba.

Princeton.
